

Move Spreadsheet-based Processes into Managed Applications

Jaggle.XL2App brings existing spreadsheet-based forms and processes into Jaggle, preserving their structure, formulas and familiar logic while connecting them to application data and controls.

When Spreadsheets Become Business-critical

Spreadsheets often become part of important operational processes. As more data and activities depend on them, separate files and individual ways of working make those processes harder to manage, maintain and apply consistently.

Jaggle.XL2App provides a practical way to bring them into a managed application environment without rebuilding the familiar structure from the beginning.

How It Works

- 1.Import:** Bring the existing spreadsheet file into Jaggle.XL2App while retaining its layout and formulas.
- 2.Connect and Configure:** Link cells to application data, define field behavior, and add the controls required by the process.
- 3.Use as an Application:** Make the completed form available inside Jaggle as a governed, trackable application.

The Value of Jaggle.XL2App

- Preserve What Already Works
- Retain existing forms, calculations and process knowledge.
- Reduce Redevelopment
- Avoid recreating established spreadsheet-based processes from the ground up.
- Connect Data and Controls
- Move from isolated files to forms connected with structured application data.
- Improve Process Consistency

Create a clearer and more controlled way of working across processes previously dependent on spreadsheets.

Indicative Use Cases

- Operational and financial forms
- Calculation and assessment templates
- Inspection and compliance forms
- Data collection sheets
- Departmental spreadsheet-based processes

Familiar Structure. Connected Data. Greater Control.

Jaggle.XL2App combines the spreadsheet experience teams already understand with the structure and application capabilities available through Jaggle.

Built on Jaggle. Developed by Comsys.

Jaggle.XL2App is part of Jaggle.Apps and is built on Jaggle, Comsys' enterprise-grade Low-code application generation platform.

About Comsys

Comsys is a technology solutions provider with more than 35 years of experience in enterprise software and contact centre solutions. Since 1989, the company has delivered solutions across 22 countries, helping companies in sectors including telecommunications, financial services, energy, and retail. With Jaggle.eu, its AI-powered low-code application generation platform, and the broader CX expertise acquired, Comsys supports organisations modernising legacy environments, integrating with enterprise ecosystems, and delivering secure applications with 24/7 post-implementation support.
